The local Palm Beach nonprofit Friends of Manatee Lagoon has partnered with Manatee Coffee through a generous grant, allowing the organization to continue its education, volunteer training, and seagrass restoration initiatives. Seagrass is the manatee's primary food source, and it's being destroyed by pollution, propellers and climate change.

The family-owned brand was founded by brothers Brad and Cary Gutwein and inspired by their love for our Florida waters. The Florida-based company generously donates to local organizations focused on local marine life and conservation.

You can purchase the coffee at the Palm Beach Gardens Costco or online [here](#). For more information about Friends of Manatee Lagoon, [click here](#).
